

How to Start a

VENDING MACHINE BUSINESS

Tired of the nine-to-five grind? Looking for opportunities to truly live the American Dream? Have you considered a vending machine business?

IS VENDING RIGHT FOR YOU?

Are you looking for a part-time thing, or are you all in? How much of your life can you invest? Is this a solo venture, or a group effort?

DETERMINE STARTUP BUDGET

Do you know how much it costs to start a vending machine business? Do you want to make a little extra money, or are you looking at replacing your nine-to-five?

CAREFULLY SELECT EQUIPMENT

Don't take shortcuts and choose secondhand machines—they'll actually cost you more in the long run. And modern vending machines with credit card and smartphone payment options will maximize your revenue potential.

CHOOSE THE RIGHT PRODUCTS

Today's vending landscape has expanded beyond sugary drinks, candy and greasy chips—demand is for healthier options, personal hygiene essentials and wellness products.

SECURE PROFITABLE LOCATIONS

Carefully consider where to place your machines. The more foot traffic in and out of a building, the higher the earning potential.

CUSTOMIZE YOUR OFFERING

Select a product mix tailored to your machine's location. Sour worms and gummy bears probably won't sell in a machine placed at a gym.

REGULARLY SERVICE MACHINES

Consumers are more likely to buy from a clean, inviting, well-stocked machine than a grimy one that doesn't work. Your machine has to sell your product when you're not there.

HealthyYOU Vending provides industry leading healthy vending machines, access to thousands of products, lifetime coaching, online support and location procurement. Everything a budding vending operator needs to succeed!
